## TOMATO SEED

Our tomato seed is grown for us by tomato seed experts, men who we believe, are the best tomato seed growers in the country. It costs more to have them grow our seed, but the results our customers have prove its value. In our descriptions we give the average number of days it takes from plant setting to maturing the fruit.

**John Baer**—73 days. Probably the most popular of all the tomatoes. Unexcelled for general purpose. Fruit is flattened globe shaped, smooth and evenly colored bright deep scarlet-red; medium large. The vines are vigorous growing and very productive. An old variety but still a good one. Oz., 40c; ¼ lb., \$1.25; lb., \$3.75.

**Rutgers Early Strain**—73 days. Large red heavy tomato with thick outer and inner walls and small seed cavities, producing few seeds. Flesh firm and red. Ripening begins at the center so that when the fruit is red on the outside it is ripe throughout. Oz., 60c; ¼ lb., \$1.75; lb., \$5.25.

**Scarlet Topper or Pritchard**—75 days. Medium large, smooth, meaty, very red globe kind, vines erect, self-topping and heavy bearing. Ripens after Earliana and before Marglobe. Flesh firm and thick walled. Oz., 60c; ¼ lb., \$1.75; lb., \$5.25.

**Stokesdale**—70 days. Medium size high quality, solid, very prolific, deep color all over. Ripens with John Baer. Splendid for market, shipping, canning. Oz., 60c; ¼ lb., \$1.75; lb., \$5.25.

**Victor**—65 days. Seems to be variable in performance. Some places it did well last year, in others poorly. Experience indicates it must be heavily fed and it can't be grown on land that dries out severely. Use Victor only as a first early variety. It can't compete with Stokesdale, Rutgers or Scarlet Topper. Fruit is scarlet, vine vigorous. Oz., 60c; ¼ lb., \$1.75; lb., \$5.25.

**Marglobe**—75 days. We offer a superb strain of this splendid tomato. It is earlier, more uniform, globe shaped, smooth, solid deep scarlet fruits of distinct quality. Plants are thrifty and heavily productive. Resistant to Fusarium Wilt and Nail-Head Rust. Oz., 40c; ¼ lb., \$1.25; lb., \$3.75.

**Bonny Best**—73 days. Extensively used for market and canning. Bright scarlet fruits, medium large almost globe shaped, solid meaty, bright scarlet in color. Oz., 40c; ¼ lb., \$1.25; lb., \$3.75.
